

Cyral Helps Sharebite Govern Access to Customer Data

“We use Cyral for data access governance for our data visualization tool. Our experience with Cyral team and the product has been incredible. The product was easy to set up and the sophistication was beyond our expectation.”

Arees Akhtar
VP of Engineering, Sharebite

About Sharebite

- ▶ Leading meal benefits provider
- ▶ US company, HQ in NYC

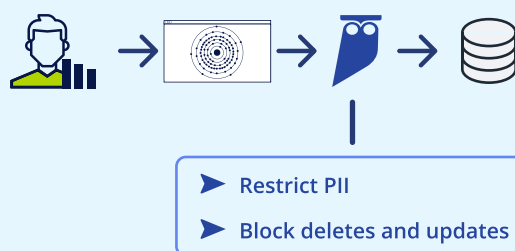

Results

- ✔ Access Governance
- ✔ Threat Mitigation
- ✔ Customer Assurance

1 Handle Service Accounts

Control access for users of data visualization tools

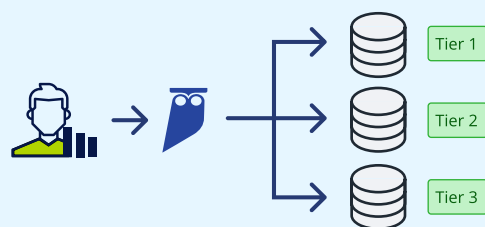

- ▶ Manage application users
- ▶ Simplify troubleshooting
- ▶ Mitigate insider risk

2 Protect Sensitive Data

Implement risk-based field-level masking

- ▶ Protect records from unauthorized users
- ▶ Embrace policy as code for agility
- ▶ Minimize blast radius

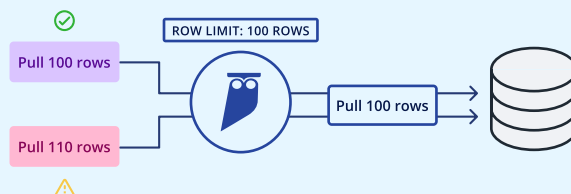

Differential, tier-based access

3 Monitor Database Activity

Complete, real-time visibility into all activity

- ▶ Eliminate blind spots
- ▶ Detect unauthorized access
- ▶ Simplify reporting and forensics

“Cyral’s Data Security Contracts enable us to specify policies on who can access what data without worrying about the underlying database roles and privileges. This reduces time and complexity of managing access governance.”
